YAŞAR UNIVERSITY (IZMIR / TURKEY)

Yaşar University is a foundation university, located in Izmir, on the West coast of Turkey. It is established in 2001 by one of the Turkey's leading industry groups, namely Yasar Holding. The University offers high-calibre teaching and strong collaboration with industry and commerce. The University provides its graduates the competencies necessary to operate in an international context. In line with this key objectives and in the ethos of Extended Erasmus University Charter, The International Project Support Office is keen to develop partnerships with other international higher education institutions under different international Programmes. Such exchanges and corporations benefit participating students and academics in terms of academic, cultural, and socio-economic awareness, technical "know-how" and experience sharing. The partner institution can be a department or school offering programs to those which are being taught in our faculties or vocational schools. Both students and academics, who are looking to take part in instruction, are very welcome.

Student placement/internship are also offered; we would like to provide our partners access to our networks with different companies and industries.

Interested partners are welcome to contact Yaşar University International Project Support Office. Our staff will be very glad to provide you with further information.

KEY NOTES
